

B.KEOGH & SONS

MANUFACTURING PTY LTD

Grunters: if you're serious about moving grain then the KEOGH range of '*GRUNTER*' Augers and Belts is your answer. Incorporating the latest design concepts, engineering abilities and power plants these units supply fast, reliable and cost effective commodity handling for large farm storages and commercial applications alike.

B. Keogh & Sons Manufacturing Pty Ltd is Australia's trusted name in commodity handling equipment. For more than 45 years KEOGH'S have been developing and manufacturing grain handling products to meet the needs of rural and commercial producers. In an industry where experience and quality do matter B. Keogh & Sons Manufacturing Pty Ltd is the undisputed leader.

Pictured is an auger unit with a Hopper for fast and continual unloading of trucks. A powerful diesel engine and a professionally engineered hydraulics system ensure these units deliver fast and effective grain conveying.

Typically these units achieve 250+ tonne per hour (dependent on many grain characteristics and on unit size and application) and operate for long periods without stopping. This is achieved by the thermal capacity of the hydraulic oil tank and the large volume oil cooler that is typically fitted to these units. Controls include extra slow to fast wheel drive, main unit lift, back lift and steering. Some units can also have a rotating and adjustable chute and grain slingers.

Key Features:-

- Handles all grain types,
- Professionally designed hydraulic system,
- Extra heavy duty materials,
- Choice of auger or belt on the same power plant,
- Large range of lengths and diameters,
- Over-sized shafts, bearings and drive systems,
- Complete hydraulic control of the entire unit.

B. Keogh & Sons Manufacturing Pty Ltd – the manufacturers of the trusted and renowned HAWK-EQUIP range of products.

DESIGNED TO PERFORM – MANUFACTURED TO LAST

GRUNTER' AUGER AND BELT MODELS AVAILABLE

<i>MODEL DIAMETERS (mm and inches)</i>	<i>LENGTHS (meters and feet)</i>	<i>CAPACITY (minimum TPH of clean average wheat)</i>
250 mm (10")	16.75 meters (55') to 21.3 meters (70')	Auger=100 – Belt=100
300 mm (12")	16.75 meters (55') to 27.4 meters (90')	Auger=120 – Belt=120
350 mm (14")	16.75 meters (55') to 27.4 meters (90')	Auger=150 – Belt=150
Other models and options available on request.		

Notes:-

1. Specifications and range subject to change without notice.

SPECIFICATIONS:-

- **Built heavier than all imported models** with renowned KEOGH extra heavy construction,
- Simple, fast and reliable control of the entire unit,
- Micro slow drive to the wheel drive system,
- Large volume oil tank complete with suction filter and return line filter,
- High thermal capacity oil cooler (optional on some models),
- CUMMINS engines on all models,
- Professionally designed hydraulic system with load sensing pumps (on most models),
- Large diameter wheels, often with duals, on the main wheel drive axle,
- Independent hydraulic systems for the main unit drive and the other equipment,
- Reclaim sweep available for both the auger and belt units (design is different between each unit),
- Swing Away Hoppers available for both units,
- Rotating and adjustable chutes and grain slingers available,
- 2 Way Divertor Spouts also available for both types of units,
- 'S' drive system used on belt models for positive power transmission from the drive drum to the belt,
